

HybridBERT4Rec: A Hybrid Recommender System Based on BERT

Sequential Content-Based and Collaborative Filtering

Leon Knorr | November 27, 2023

Table of Contents

1. Recap

- Sequential Modelling
- HybridBERT4Rec

2. The Setting

3. Model Adaption

4. Evaluation

Evaluation
○

Traditional CBF VS Sequential CBF

Target user
(Alice)

Figure 1: Example history for Alice in traditional CBF [1]

- models **general** user preference

Traditional CBF VS Sequential CBF

Figure 1: Example history for Alice in traditional CBF [1]

- models **general** user preference
- **BUT:** User preferences change over time! [2]

Traditional CBF VS Sequential CBF

Target user
(Alice)

Figure 1: Example history for Alice in traditional CBF [1]

- models **general** user preference
- **BUT:** User preferences change over time! [2]

Target user
(Alice)

24.1.23

26.1.23

28.01.23

30.01.23

Figure 2: Example history for Alice in sequential CBF [1]

- Considers the **order** of historical interactions
- Allows the modelling of “temporary spikes” of interests, as well as the general preferences [2]

HybridBERT4Rec Architecture

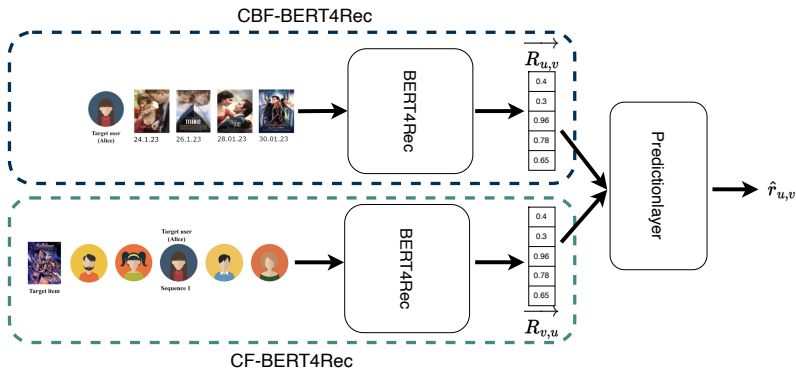

Figure 3: High level overview of HybridBERT4Recs Architecture. [1]
